## Green Campus Policy

PMCA and nature have a long and enduring relationship, since the onset of the Institute. The PMCA Campus stands on the fertile banks of River Mahanadi. It boasts of at least 50 different kinds of plant species ranging from the naturally occurring to the exotic. This attracts a bevy of migratory and local birds to the campus which makes it an attractive place to be. The campus is a network of lawns, landscaped topography and gardens.

The Green policy and Initiatives of the campus include

- Annual Ban Mahostav with tree plantation by faculty and students
- Ban of plastic bottles
- Smoke Free campus
- Ban on motorized traffic in the campus
- Natural lighting in class rooms
- E-Waste recycling
- Rain Water Harvesting
- Pedestrian amenities in the campus
- Effective Waste Management

The scope of the Green Policy includes involving students in the landscaping of the campus with plantation initiatives, regular class projects involving identification of flora and fauna, awareness initiatives involving all stakeholders, etc. The aim and objective of the Green Policy is to have a pollution free, calm, sustainable campus where education comes with an awareness of environment.
